## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-7, drawn to an adhesive.

Group II, claims 8 and 9, drawn to a composition.

Group III, claim 10, drawn to a process.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature among the inventions is the adhesive, which is not is either not novel or lacks an inventive step as evidenced by Terahara *et al.* (U.S. Patent Application Publication No. 2006/0110433; Filed Aug. 7, 2003 and claiming priority to JP 2002-249417). Specifically, Terahara *et al.* disclose a patch comprising an adhesive agent which comprises acrylic polymers that have no substantial carboxyl groups (abstract). The adhesive taught by Terahara *et al.* contains a copolymer of polyacrylate and diacetone acrylamide (i.e. copolymer A of instant claim 1) (paragraphs [0013] and [0025]; claim 5) and a basic nitrogen-containing acrylic copolymer wherein the nitrogen may be a primary amino group (i.e. copolymer B of instant claim 1) (paragraphs [0010],

[0011], [0046], and [0047]). Terahara *et al.* teach that the nitrogen-containing copolymer (i.e. copolymer B) is present in a range of 1-30% by weight (paragraph [0052]). Terahara *et al.* are silent as to the specific diacetoneacrylamide content of the polymer in their invention. However, it is reasonable that the polymers taught by Terahara *et al.* contain diacetoneacrylamide in the range of 3-45%, absent evidence to the contrary. Alternatively, it would be routine for one of ordinary skill in the art to produce the acrylic/diacetoneacrylamide copolymers with a diacetoneacrylamide content in this range. Thus the adhesive of instant claim 1 is either disclosed or suggested by Terahara *et al.* Because this element cannot be considered novel and/or lacks an inventive step, it is not a special technical feature as defined under PCT Rule 13.2, Part I (b). Thus, the Groups do not share a common special technical feature and are subject to restriction.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

5. In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
